Version 05/2021

Focusing on high comfort and customer need, F&W invented a new type of nose pad with even more wearing comfort than regular silicone pads. In addition to the benefits offered by pads made of silicone, an air cushion system makes this pad even more comfortable to wear. Inside the anti-allergic silicone pad is a hollow chamber and an opening at one end. This creates an air cushion - the opening works like a valve enabling the pad to adjust itself automatically. What an ACTIVE pad!

Air Active® pads are available in several sizes and in click and screw type.

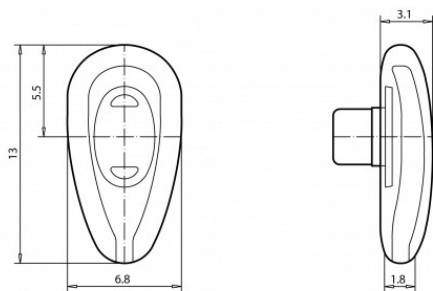

**100% Made in Germany in our own facilities
and with tested materials only**
