# Cabrio®

## The new openness - delicate in appearance

Instead of being equipped with a closed pad box, our Cabrio® pad arms are open on both sides, still granting the perfect hold of the nose pad and the same mobility that adjusts to the wearer's nose.

Standard

Cabrio

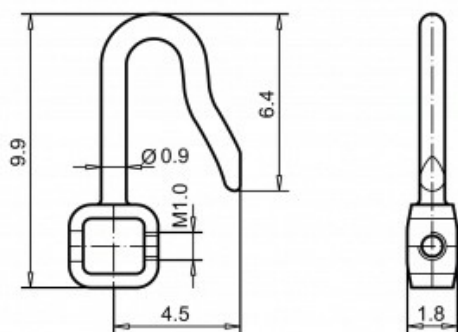

With a pin diameter of only 0.9 mm and a delicate pad box of only 1.8 mm, Cabrio® pad arms are particularly well suited for thin, light frames. They can be combined with all screw-type pads offered by F&W.

**100% Made in Germany in our own facilities  
and with tested materials only**
