

Personalization of pads

Three very good reasons to buy F&W!

1. Wide variety of pad design with 25 shape variations to choose from – all made for click- or screw-type pad arms.
2. Personalized pads: single-foil or double-foil printing, or ink printing, or even four-coloured logos are possible. We will find the best option to set your logo in scene on the frame. We are eager to work with you on your unique ideas!
3. Top quality parts! We use tested materials only. All PVC pads are phthalate-free and we guarantee compliance with REACH and EN ISO 12870:2014.

and with tested materials only**

● ● ● | Personalization of pads – 3 good reasons to buy F&W

1. Choose your design from our wide variety of pad shapes

Square, trapezoid, round, triangle or drop shaped? We offer 25 possible shape variations to choose from, all made to fit click-type or screw-type pad arms from 9 mm up to 19 mm in size. For details please ask for our World of Shapes – or visit our online catalogue.

2. You want to put your logo in scene?

We have several options to find the best production method for your logo:

Single printing

The logo is printed onto a transparent pad inlay by using a metal foil. This process is suitable for logos in large sizes and bold letters or fonts. Foils are available in silver, gold and other colours.

Double printing

This is a particularly first-class type of printing, which is usually applied in gold or silver. Its appearance is surprisingly close to a metal inlay without the disadvantage of corrosion. The first step is a basic printing, for example on a matte golden foil. Then the actual logo is printed on a shiny golden foil. We also offer silver-gold combinations.

Multicol printing

This method is appropriate for very fine logos and letters. In addition, it offers the possibility to print logos in up to four colours.

Deluxe version

This printing combines the advantages of both methods - foil-printing to give the pad the metal inlay appearance and Multicol printing to be used for fine thin logos or special colours not available as foil.

3. We are known for top quality:

We use only tested materials – all PVC pads are phthalate-free.
We guarantee compliance with REACH and EN ISO 12870:2014.

For more details on the material, please ask for our safety data sheet.
