Focusing on high comfort and customer needs, F&W offers anatomical bridges which are made of an anti-allergic, crystal-clear silicone bridge with two clear polycarbonate inlays inside to be fixed to the pad arm.

These bridges are the perfect solution for those who want to feel nothing but the comfort of silicone on their nose or, more interestingly, for those who want only the cream of the crop for their children's frames.

Besides using the neutral version, customers can personalize the pad by a logo printing.

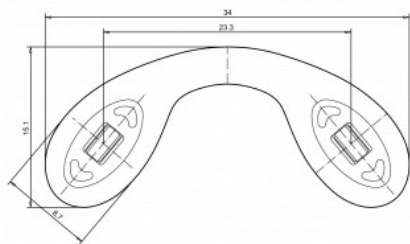

**100% Made in Germany in our own facilities
and with tested materials only**

Version 05/2021

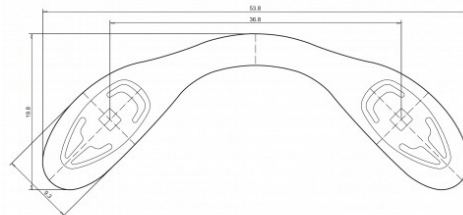

Body: Anti-allergic, crystal-clear silicone

Inlay: Clear polycarbonate

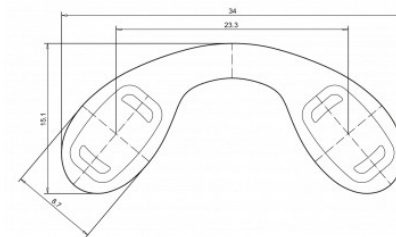

Logo/brand: Different types of logo printings available on request
