The little **extra** made of metal

Available in grade 1 titanium and stainless steel

If you want your glasses to stand above the competition and shine with a high-quality finish, the little "extra" that comes from stainless steel or even titanium is the perfect choice.

Apart from a smooth-polished surface, you can choose to have a sandblasted surface, a customized surface, and/or personalized laser engraving.

Metal pads are the ideal choice in comparison to many other materials. Its surface cannot absorb any potentially allergenic substances, which makes it ideal for people with skin problems. In contrast to other metal pads, titanium pads are very lightweight and corrosion-resistant.

In order to achieve a wider range of designs for trendsetting frames, F&W launched a stainless-steel series which come in various colours using specialized galvanization techniques!

Click Type

| Article | Size | Article | Size | Article | Size | Article | Size |
|---------|--------|---------|---------|---------|---------|---------|---------|
| 60187 | 8.0 mm | 60144 | 11.7 mm | 60122 | 13.0 mm | 61149 | 14.5 mm |

Screw Type

| Article | Size | Article | Size | Article | Size | Article | Size |
|---------|--------|---------|---------|---------|---------|---------|---------|
| 60188 | 8.0 mm | 60145 | 11.7 mm | 60124 | 13.0 mm | 61148 | 14.5 mm |

Available structure surfaces (example on rectangular shape)

surface structure 'Track'

surface structure 'Ray'

Galvanic treatment

(different colors available on request)

Body: Made of titanium or stainless steel

Logo/brand: Surface structure, logo engraving and different colors available on request
