Qualified fit of acetate

Stainless steel padarm & Silicone pad

You want to upgrade the wearing comfort of your fantastically looking acetate frames? Our new pocket system offers an interesting solution.

A one piece padarm construction made of stainless steel with rivets for acetate frames, combined with a silicone pad, which is just slid on the padarm - that's it!

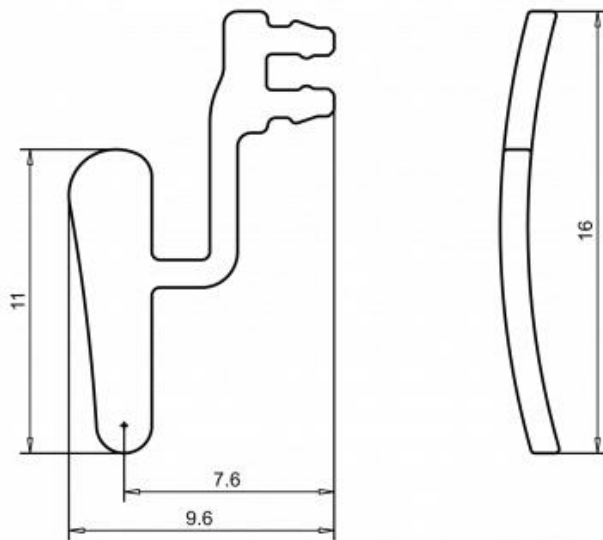

Stylish acetate frames with outstanding comfort!

**100% Made in Germany in our own facilities
and with tested materials only**
