The F&W invented System 3 consisting of a pad arm and a matching nose pad. Inlays are abandoned and handling is simplified – the foot of the pad only needs to be slid through the pad arm opening.

Due to its great success, we offer pads in various shapes, and pad arms in different materials and for different kind of frames.

As always, our customers can choose between different colours and may even decide on a non-standard colour.

**100% Made in Germany in our own facilities
and with tested materials only**

Variety of System 3 Pads

General details – Silicone Pads

These single-piece pads are entirely made of anti-allergic silicone and BPA free.

A soft silicone stud is slid into the opening of a pad arm or an opening of a chemically etched frame.
