The lens rings are not only used for the decoration of rimless frames giving the lens a colourful extravagant look, but it also acts as buffer.

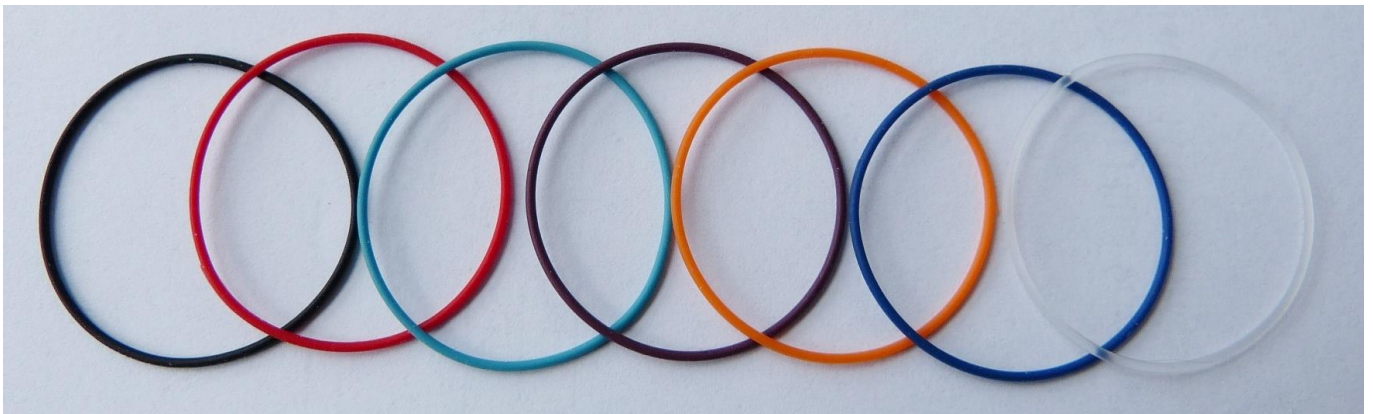

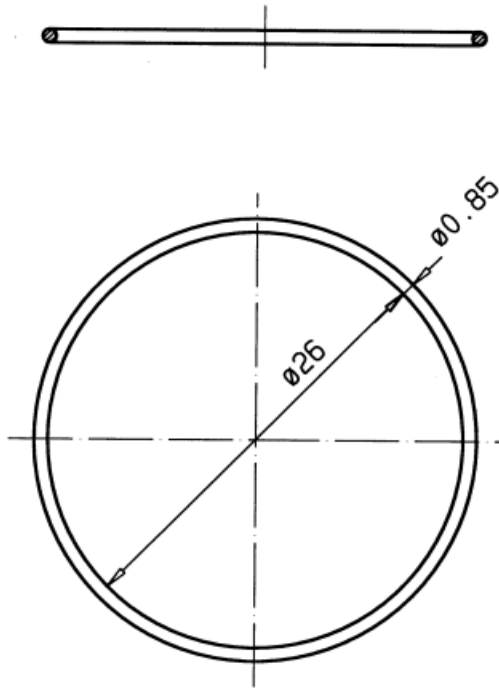

All rings are made of a softener-free silicone meeting the currently valid REACH regulations. Due to its high material properties, the lens rings are resistant against embrittlement, offering a high tensile strength (>300%) and low compression set.

The lens rings are available in the following colours:  
black, red, bluegreen, orange, blue and transparent.

**100% Made in Germany in our own facilities  
and with tested materials only**

● ● ● | Lens Ring D26mm
